

BUILD A BRIGHTER FUTURE

Boilermakers are craftsmen and women who help to build and power North America. We're welders and riggers who keep the lights on across the country and produce the fuels that move the nation into the future. We are essential workers who warm your home in the winter and make products you use in your daily life—from paints to plastics, medicines to green energy, we've had a hand in it all.

Skilled craftsmen are in high demand across North America. As a Boilermaker you can earn top wages and enjoy excellent benefits

- Health insurance for you and your family
- Pension
- Annuity
- Ongoing training
- Union Plus discounts, and free college
- Union Sportsmen Alliance membership

“ I thought I'd be making good money with the certifications I had. I found out the local weld shops and non-union gigs didn't pay very well. In the skilled trades, the unions are where you're going to make a good living. ”

— Josh Slater, Graduate Apprentice
Boilermakers Local 169

READY TO FIND OUT HOW TO BECOME ONE OF NORTH AMERICA'S MOST ESSENTIAL AND SKILLED WORKERS?

WE HAVE A PATH FOR EVERY SKILL LEVEL

Boilermakers have openings for every skill level, from new grads to seasoned workers. Regardless of your background, we'll train anyone who has a solid work ethic.

We have modern training centers across North America, a special program for former military and continuing education for career advancement.

Want to avoid the high cost of college but not get stuck in a minimum wage job?

Learn a skilled trade and become an expert welder and rigger at the affordable price of

\$ZERO
